

Basketball backstop, portable with projection of backboard 125 cm

Description

Portable backstop construction - mini basketball basket with a 125 cm reach, height adjustable in the range of 200-260-305 cm, safety paddings, swivel castors, rear part of the construction made of corrugated aluminum sheet.

The structure is intended for indoor and outdoor use, in places where it is not possible to mount the structure to fixed baskets (wall mounted or ceiling assembled). It is equipped with a system of smooth height adjustment in the range of 200 cm (storage), 260 cm (junior basketball), 305 cm (senior basketball).

The construction is equipped with a counterweight in the form of a "suitcase" load (8 loads, 30 kg each, covered with corrugated aluminum sheet) as well as a safety catch mounted in the surface, which is placed in the floor frame with a lid. Front protected by a cover - polyurethane foam, thickness 5 cm on a plywood structure, all trimmed with washable scandem type material.

The full dimension of the basketball in the playing position: 3090x1900x3973 mm (dimensions with the board 105x180 cm). Basketball dimension in storage position: 2600x1900x3066 mm (dimension with the board 105x180 cm).

Basketballs construction has portable possibility due to the use of wheels.

The structure is adapted to use all types of backboards (105x180cm backbord and 90x120cm

backboards, epoxy and acrylic glass backboards) and rings. These products constitute a separate item available in our store.
