

The basketball ring, flexible version with springs and no hooks

Description

The tilting basketball ring with spring cylinders, hookless net fixing system.

A basketball ring made of steel rod and steel elements. The tilting system is made of three special springs (closed, guaranteeing full safety), working already with a load of 105kg, the rim returns to the starting position immediately after releasing the frame.

Hook-free net fastening system - easy net assembly. The ring compliant with FIBA and EN requirements and regulations. Standard ring painted in 2004 RAL powder method.

The ring's net is a separate offer in our store, we invite you to shop.
