

Gymnastic rope to climbing, height 7m

Description

Gymnastic rope to climbing, height 7m, made of jute.

Jute rope, naturally friendly, with a curly method. Is the most popular form of gymnastic rope available on the market.

The lower end of the rope is secured against unscrewing with twine braid and a plastic cap. The upper part of the rope is terminated with a sling element - a round steel eye hook, for attaching to the bracket. It is possible to make catches at both ends (on request).

Intended for schools, sport clubs, gymnastic societies or for recreational use. It is possible to make a shorter rope or with a non-standard size - on request.
