

Portable Badminton Posts - Mobile, Weighted 30 kg

Description

Our **Portable Badminton Posts** are designed for schools, sports clubs, and recreational facilities. The posts feature built-in **30 kg counterweights** for maximum stability during play, while the **non-marking wheels** allow effortless movement across any indoor court. Ideal for quick setup and takedown.

30kg load allows effective stretching of the badminton net at the required height and polyurethane wheels protect the surface against bruising during transport. The posts are portable to any place in the sports hall and storage.

Special cleats (clamp, horn) were used to fix the net and its tension. The posts are powder painted according to RAL palettes. Application for professional and purely recreational games.
