

The tennis table concrete, outdoor grinded countertop

Description

The tennis table concrete, outdoor grinded countertop, based on natural aggregates. The base is made in the technology of "uncovered aggregates". The table top in green or blue surrounds the aluminum profile that protects the table edges from impact. The surface of the countertops is ground, polished and protected with varnish. The net is made of black galvanized steel sheet. The method of attaching the net protects it against quick and unauthorized disassembly.

It is possible to attach the table to the ground with a metal anchor or a prefabricated concrete anchoring element. Table design for seating at the destination.

Table dimensions: 274x152x76cm, weight approx. 800 kg
