

The volleyball posts, aluminum professional

Description

The volleyball posts, aluminum professional installed into sockets, they are made of anodized aluminum 100x120mm. Screw winding mechanism, sliding with the use of an eccentric - locking the mechanism after pressing the handle, inside the post. The tension mechanism is regulated by a crank hidden in the post profile.

Each post has five points for attaching the net to the tension. Smooth net height adjustment allows for multifunctional adjustment in the range of 105 - 250cm and the possibility of using badminton or tennis nets.

Each post has the option of setting the net tension on both sides of the profile, which also allows it to be used as a central post. The posts are designed to be placed on the main pitch in sports facilities over 12m wide and on training pitches in halls over 24m; can also be mounted on outdoor courts. They do not require haul-offs from the ground.
