

The volleyball posts, tournament on frame

Description

The volleyball posts, tournament installed on frame to sports surface, they are made of steel profile 80x80mm, painted with powder coating system or hot dip galvanized. Screw winding mechanism, sliding with the use of an eccentric - locking the mechanism after pressing the handle, on the post. The tension mechanism is regulated by a crank fixed on the post profile.

Smooth net height adjustment allows for multifunctional adjustment in the range of 105 - 250cm and the possibility of using badminton or tennis nets.

The posts are designed to be placed on the main pitch in sports facilities over 12m wide and on training pitches in halls over 24m; can also be mounted on outdoor courts. They do not require haul-offs from the ground.

The posts are fixed to the ground by use the fixation screws, special adaptation to the sports surface and frame construction of the posts. In any time they can be disassembled and move to storage or another play location.
