

The volleyball posts, steel, tournament with socket

Description

The volleyball posts, steel tournament installed into sockets, they are made of steel profile 80x80mm. Screw winding mechanism, sliding with the use of an eccentric - locking the mechanism after pressing the handle, on the post. The tension mechanism is regulated by a crank fixed on the post profile.

Smooth net height adjustment allows for multifunctional adjustment in the range of 105 - 250cm and the possibility of using badminton or tennis nets.

The posts are secured before corrosion by hot dip galvanizing, can be painted optional with powder coated method.

The posts are designed to be placed on the main pitch in sports facilities over 12m wide and on training pitches in halls over 24m; can also be mounted on outdoor courts. They do not require haul-offs from the ground.

Installation in the sockets, which are made from 90x90mm and deep for 50cm.
