

The gymnastic mat 200x120x10cm

Description

The gymnastic mat with dimensions 200x120x10cm made of foam T25, antyslip bottom. Cover sewn, top and sides made of special PVC material coated on one side and the bottom of the mattress is made of non-slip material. Filling - high-quality, flexible polyurethane foam T25. Mattresses can additionally contain: reinforced corners (4 pcs) made of PVC fabric or natural leather, (protect the most vulnerable parts of the mattress), transport handles (facilitate the transfer of mattresses), the system connecting mattresses with a Velcro, the system connecting mattresses with a corner Velcro.

Both joining systems prevent the mattresses from sliding apart and allow the mattresses to be combined in any exercise fields, battlefields.

To allow perfect adhesion of the mattress, it is inadvisable to use corners and handles.
