

The masking plate for outdoor playfields

Description

The masking plate to steel sockets in outdoor playfields, made of 80x80mm cold-formed sheet steel, designed for outdoor playfields with volleyball tournament posts. The lid function is to protect the bushing of the goal post, when the posts are stored, to protect against falling of non-referenced elements, or to protect against possible injuries to users of the pitch.

The lids are used outside, protected against atmospheric factors by hot galvanizing, in the case of polyurethane surfaces the lid is filled with PU in accordance with the color of the surface.
