

The football goal, professional aluminum with dimensions 7,32x2,44m, with sockets

Description

Professional football goals in accordance with FIFA standards and regulations, with dimensions 7,32x2,44m,

The Goal is mounting in accordance with FIFA standards - sockets, embedded into the ground. The goals is painted white RAL 9016, using the powder coating method. The main frame of the goal is fastened in the corner with a special connector that stabilizes the structure and allows the goals to be transported anywhere in a folded form (easier to transport).

Thanks to the reinforced profile of the gates, their use is for many years, without changing the shape or discoloration or losing the connecting elements. It is a compact structure designed for all pitches and stadiums in every league, from class to league.

Depth of the goal: 200x200cm, goal made of aluminum profile 100x120mm, reinforced, installed in the steel socket (round diamtere fi 133mm). Steel tension posts with socket included.

The goal set includes:

- professional goal - 1 pc,
- Net tensioning posts - allow proper stretching of the goal net. Extraction posts mounted in the sockets.
- a set of fasteners, including screws and cubes.

- A set of bottom frames is a net stabilization.

The set does not include net and ground fixation sockets. Equipment is according to PN - EN standards (with manufacturer's certificate) and FIFA standards adapted to 2m depth net.
