

Gymnastic straight vaulting box 6 pcs, with trolley, natural leather

Description

The gymnastic straight vaulting box with trolley, 6 sections, covered with natural leather. The elements (segments) of the box are made of paralleleward plywood (wall thickness approx. 18mm). The stability of the structure is provided by twisted corners made of solid beech wood. The whole is finished with ecological transparent varnish.

The upper segment of the gym box has a foam foam lining covered with natural leather, while the bottom one is equipped with non-slip, non-marking PVC feet.

The box is equipped with a fixed mobile trolley. The trolley is activated by means of a handle, which, when turned, lifts the entire structure thanks to the built-in trolley with wheels. The construction can be pushed anywhere.

Dimensions: length 145cm, width 45cm, height 110cm. Weight about 100kg.
