

## The basketball construction, budget - 2 version with backboard and ring

### Description

**The basketball set in the budget version consisting of: a structure with a projection of up to 80cm, basketball backboard with dimensions of 90x120cm, reinforced ring + net for the ring.**

A simple structural frame allows you to attach the set without major problems in the sports hall (fastening to reinforced concrete, walls made of hollow brick, brick or other building materials).

The set is used in halls or gyms, where there is no need or possibility to use professional constructions or the conditions do not allow it. Recommended to this construction is purely training, it can be used by adults and children.

Basketball construction made of steel profiles, powder coated in RAL colour (to choose). Basketball backboard made of epoxide resin. Basketball ring reinforcement + net.

A good solution at a reasonable price.
