

The handball goal, steel with dimensions 3x2m

Description

The handball goal, steel with dimensions 3x2m with stable or folding bows (on request) with depths of 1200/1000, 800/600, 500/500.

Goals made of 80x80mm steel profile, in accordance with IHF and EHF standards. Products intended for playing handball but also traditionally used for recreational playing football or indoor soccer.

The goal using a new method of joining profiles are bolted in the corners with a special steel angle. Handball goals are hot-dip galvanized, which protects the material against corrosion.

Goals are extremely durable and thanks to the steel structure, it is possible to transport or fix permanently. The goal is painted in RAL stripes: blue, red, green, black and others on request.

All goals components are painted or hot dip galvanized. In addition, we invite you to buy mounting elements (sockets, pines and also floor/ground plates).
