

The handball goal, aluminum with dimensions 3x2m wall-mounted

Description

The handball goal, aluminum with dimensions 3x2m wall-mounted with depths 500/500mm

The goals are made of 80x80mm aluminum profile, in accordance with IHF and EHF standards. The product is intended for playing handball but also traditionally used for recreational playing football or soccer.

The post profiles are bolted in the corners thanks to the use of a suitable steel angle. The goals are extremely durable, transportable or permanently fixed.

The depth of the arches 50/50cm - as standard or other on request. The aluminum profile is anodized in base, with extra surcharge painted in white with powder coating method. The bows made of pipe, hot-dip galvanized.
