

The basketball outdoor single construction, projection 1,6m to backboard 105x180cm

Description

The basketball outdoor single construction, projection 1,6m to backboard 105x180cm. The structure consists of:

- steel post with a 100x100mm profile, galvanized or painted,
- backboard brackets (struts),
- socket (optional),
- cover to socket.

The basketball post can be fixed in a socket or fixed directly in the footing. The set is provided to the basketball backboard with dimensions 105x180cm with 160 cm extension (distance between the mounting point and the basketball court line). Other projection construction are available in this category.

The construction has the ability to adjust the height of the backboard on the post, thanks to the post clamp, it is also possible to attach a height adjustment mechanism that will allow you to smoothly adjust the height of the basketball backboard and ring with net between 3050mm and 2600mm.

The whole structure is protected against external factors by hot galvanizing. It is possible to paint

the structure (for installation inside a sports hall) or galvanize and paint - optional.

The set does not include the basketball backboard, ring, net or height adjustment mechanism.
